

# Thank you for purchasing a **PureDri** Sanitizing Hand Dryer

Protect hands with a blast of super-concentrated ionized air following the drying cycle, while providing continuous sanitization to the room itself.

**For use in facility restrooms.**

**INTRODUCE** PureDri to your facility patrons. Install your device using the provided decal and placard as a visual cue to show employees you take their health and well-being seriously.

**EDUCATE** employees and answer any questions they might have with the FAQs on the following pages.

**READ** responses from users. The placard explains how and why we are gathering feedback from the workplace.

**CHOOSE** your facility's next locations. Add PureDri and PureSphere where needed for cleaner, fresher areas throughout your building.

Sanitizing Hand Dryer

## FREQUENTLY ASKED QUESTIONS

### **Q: How effective is this product in keeping patrons safe?**

**A:** The best-in-class technology of BobrickPure Hygiene Solutions is proven to kill 98.11% of airborne and 99.6% of surface microorganisms.

### **Q: How does the PureDri Sanitizing Hand Dryer work?**

**A:** The unit works by combining three advanced technologies to emit a constant flow of disinfecting plasma, which is proven to eliminate microorganisms both in the air and on surfaces. Similar to lightning in the atmosphere, plasma creates positive and negative ions, which neutralize odors to generate a clean smell similar to the air after a thunderstorm.

### **Q: Is the UV light technology safe?**

**A:** Yes. UV light cannot escape from the unit from any angle, which ensures the device and its technology are completely safe.

**Q: Can the PureDri Sanitizing Hand Dryer protect patrons from coronavirus?**

**A:** Currently, coronavirus testing using a live virus is prohibited. However, because coronavirus is the type of virus with lipid envelopes outside of the human body, it falls into the same category as influenza, making it one of the easiest types of pathogen to destroy with the PureDri Sanitizing Hand Dryer. BobrickPure technology has been proven to reduce or eliminate the efficacy of all tested microorganisms, including those that are harder to kill than viruses with lipid envelopes. Therefore, we anticipate the same efficacy result against coronavirus.

**Q: Do I need to clean less frequently if I install a PureDri Sanitizing Hand Dryer?**

**A:** We recommend a consistent cleaning regimen, with or without BobrickPure Hygiene Solutions. You will experience an overall healthier, odor-free environment thanks to purer, sanitized air.

Show you care while creating a culture of wellness & hygiene
